OBJECTIVE

Third-year Computer Engineering student with hands-on academic experience in MERN stack development. Strong understanding of Data Structures, REST APIs, and core web technologies. Motivated to build scalable, efficient applications and continuously improve development skills.

EDUCATION

Bachelor of Computer Engineering

KJEE's Trinity Academy of Engineering, Pune — SGPA: 7.5

Expected June 2027

Pune, Maharashtra

HSC — Science

Don Bosco Jr. Clg — Percentage: 66

June 2022 – April 2023

Pune, Maharashtra

SSC

St. Anthony's High School — Percentage: 78.20

June 2020 – May 2021

Pune, Maharashtra

SKILLS

- **Languages:** JavaScript (ES6+), Java, HTML5, CSS3
- **Frontend:** React.js, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL
- **Tools & Technologies:** Git, GitHub, MongoDB Atlas
- **Core Concepts:** Data Structures & Algorithms, OOP, OS, DBMS

PROJECTS

Real-Time Chat Application (MERN + Socket.io)

2025

- Developed a scalable real-time messaging application using MongoDB, Express.js, React.js, and Node.js.
- Implemented WebSocket communication using Socket.io for instant bi-directional messaging.
- Integrated JWT-based authentication and authorization for secure user sessions.
- Built features including online/offline status, unread message tracking, and media sharing.

AgroControl – Smart Agricultural Marketplace

2026

- Built a full-stack e-commerce platform for farmers and buyers using Django, JavaScript, HTML, and CSS.
- Implemented authentication, crop management, payments, order tracking, and admin dashboard features.
- Developed responsive UI and integrated backend APIs with database operations for seamless user experience.

EXPERIENCE

Python Full Stack Developer Trainee – EYJDS (Remote)

Jan 2026

- Completed hands-on training in Python full stack development with exposure to frontend, backend, and database technologies.
- Developed a web-based platform that enables farmers to connect directly with end users.
- Contributed to backend development, database integration, and core application features.
- Built a user-friendly solution focused on improving direct communication and accessibility.

ACHIEVEMENTS

- Finalist – Techathon 3.0 a Nation level Hackathon 2026
- Winner – SIH Internal Hackathon 2025
